🪪 PROFILE

Full-Stack Laravel Developer experienced in building scalable web applications and APIs using PHP, Laravel and MySQL. Skilled in RESTful API development, third-party API integration (Stripe, Paypal, Razorpay, PerfectCrop API, AI APIs, Google Meet, Map, Calender API, Twilio API), and remote collaboration using GitHub. Passionate about delivering clean, optimized, and maintainable code following industry best practices.

💼 PROFESSIONAL EXPERIENCE

Jan 2025 – present
Dhaka, Bangladesh

Softvence Agency
Jr. Laravel Developer
- Built and maintained **Laravel applications as Backend for building mobile apps and web API.**
- Integrated **third-party APIs** (Perfect Corp AI, Google Meet, Calendar, Map, Stripe, Paypal, Razorpay, Twilio API etc).
- Implemented user **role-based authentication** (JWT, Laravel Breeze).
- Deployed apps on **cPanel and maitain github workflows for CI/CD,** optimizing performance and security.
- Collaborated with a **remote team using GitHub, Google sheet, Microsoft Teams and Telegram.**

Dhaka, Bangladesh

Brain Station 23 (Learnathon 3.0) ↗
Project Intern (Remote)
- Selected as a leader of the **Jkkniu_Knight_Riders** team under the PHP category, from 500+ global teams, in a competition organized by Brain Station 23.
- Engaged in **developing and implementing PHP-based solutions** with a focus on performance and scalability.
- Collaboration on **Github** for building the projects.

🎓 EDUCATION

Feb 2020 – Jan 2025
Trishal, Mymensingh, Bangladesh

B.Sc in Computer Science & Engineering
Jatiya kabi Kazi Nazrul Islam University ↗
Gained strong foundational knowledge in **software development,data structures, algorithms, database designs, system design,** and web technologies focusing on Full-Stack development with a passion for building efficient and scalable systems.

🧠 SKILLS

Backend
PHP, Laravel, RESTful APIs, Authentication (JWT, Breeze, Sanctum)

Databases
MySQL, MariaDB, SQLite, MongoDB

Frontend
Blade, JavaScript, Bootstrap, Tailwind

DevOps & Tools
Git, GitHub, Bitbucket, Jira, cPanel, npm, Composer

📂 PROJECTS

Tutor–Student Lesson Sharing Platform
Developed a full system with **onboarding, tutor/student and admin dashboards, Google Meet & Calendar API integration**.
- **Students**: book lessons, mark tutors as favorite, view past/upcoming lessons, chat with tutors.
- **Tutors**: set availability/slots, manage earnings, view students list, and communicate in real-time.
- **Features**: country/subject filtering, Stripe payments, chat system.
- Tech: Laravel, React.js, MySQL, Stripe, Google Meet/Calendar API, WebSockets.

AI Skin Analysis API (Face Scanning App)
Built APIs for an **AI-powered skincare app** using **Perfect Corp AI API**.
- Users upload selfies → system analyzes skin & suggests personalized products/routines.
- Includes **trial & subscription plans** with secure authentication.
- **Tech:** Laravel, Flutter, JWT, MySQL, Stripe, Perfect Corp AI API.

Food Delivery System
Designed a **multi-role delivery platform** with separate apps for **Customers** and **Delivery Boys**, plus an **Admin dashboard**.
- **Admin**: manage products, categories, pricing, delivery boys & shifts.
- **Customers**: browse menu, order, track orders.
- **Delivery Boys:** receive **real-time notifications**, manage deliveries.
- Real-time distance calculating delivery charges applied via **google map API.**
- **Twilio API OTP verification** for secure logins and registration.
- **Tech:** Laravel, Flutter, MySQL, Twilio API, Pusher (real-time).

Web Scraping E-commerce Platform
Developed a platform that **aggregates products from multiple websites** via custom web scraping.
- Displayed products in unified interface with pricing & details.
- Built **custom admin dashboard** to manage categories & product listings and sent email to customers.
- **Tech:** Laravel(Scrapy/requests/Jobs & Queues), React, MySQL.
